

No more big white van

Deliver your passenger without a delivery van in the new wheelchair friendly, Freewheeler Kangoo.

If you move people in wheelchairs you'll be aware of the downsides of big, white vans. They're great for big numbers, but not easy for everyone to drive and park. And they make wheelchair passengers feel like freight - particularly when travelling up the back, remote from the driver. Freewheeler Kangoo is more than a cost effective alternative to the big, white van - it brings new dignity to outings for wheelchair users.

- Easy to drive, Automatic Transmission and ABS Brakes
- Accommodates a wheelchair user and up to four other passengers
- No hydraulic hoist to operate, break-down or rattle
- Parks anywhere, including underground car parks
- Better visibility than most big white vans
- Much smoother ride than big white vans
- Doubles as a pool vehicle for organisations
- 3 year/100,000 km warranty on car and conversion

Hi David,

Just a note to let you know that the Kangoo is going really well - my staff are now fighting over who gets to take the Kangoo and our clients are really impressed - no more big white van!!!

I have had a few enquiries from other disability services who love the look and functionality of our car. So I thought if you want to send me some more brochures I would be happy to hand them out to people who are interested as I think the cars have so much to offer people with a disability.

Cheers, Kellie - SeQual
Po Box 318, Ashgrove, 4060

SeQual is a Brisbane based community organisation providing services to people with a disability and one of several such organisations using Freewheeler wheelchair-friendly cars from Fleetworks Mobility.

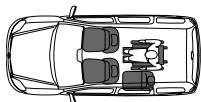

Take care of OH&S issues - With finger-tip light ramp and electric restraints, there is no lifting, straining or kneeling. Roll-on, roll-off loading is easy for carers of any age. The power loading option makes loading and unloading of heavy manual wheelchairs a breeze - even for smaller carers.

Economy - The highly efficient 16v 70kw engine is a pleasing performer but a miser with fuel. Renault figures show Kangoo uses only 8.0 L/100 kms (Auto) on combined city/country cycle. Low servicing costs and 15,000 km service intervals means even more savings on operating costs.

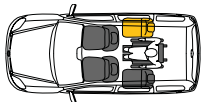

No more compromises - Everyone wins with Freewheeler Kangoo, including the driver, who is spoiled with the high level of standard equipment, including air conditioning, power steering, dual air bags, ABS with emergency brake assist, keyless entry, power front windows and mirrors and trip computer. With a four-star Euro NCAP rating, Kangoo is at the top of its category in terms of passive safety.

Hands-on experience - Our practical experience gained from a working lifetime in the motor industry and over 38 years experience as parent/carers is obvious as soon as you see a Freewheeler Kangoo.

Seating for up to 5 passengers including wheelchair.

Standard 3 seat layout

Optional 4 seat layout

RENAULT ACCORD CONVERTER

Takes the largest wheelchairs

Useable floor length 1585 mm

Loads of headroom
