

There is a Freewheeler Caddy MAXI Life model to suit everyone - private buyers, community organisations, councils, nursing homes etc.

***No more big white van
– a new approach for
community organisations***

“We use this vehicle to transport local clients around for medical appointments, shopping trips, hair dressing appointments and clients needing transport in wheelchairs. All our clients have commented on how soft the ride is in the vehicle and that it is much better to ride in... The volunteers who drive the Freewheeler Caddy MAXI Life tend to want to claim ownership.”

*Michael Morgan
Manager, Lithgow Community Transport*
